Education

Vellore Institute of Technology, Bhopal

2023 - 2027

B.Tech in Computer Science & Engineering

8.46/10 CGPA

Work Experience

Avyaan Management Limited (Bhopal)

May 2026 – June 2026

Software Development Intern

Offline

- Developed and deployed a full-featured **Point of Sale (POS)** system using the **MERN** stack (**React.js**, **Express.js**, **MongoDB**) with offline support and cross-platform accessibility
- Delivered a complete end-to-end packaged solution with zero internet dependency, ensuring reliable multi-device deployment across environments
- Built an in-house **Finance Management App** with department-level oversight, role-based verification, and partial/full payment workflow support

Amasqis.AI (Oman & Chennai)

March 2025 – September 2025

AI Intern

Remote

- Architected and developed a **multi-tier backend** using **Express.js** with structured models, routes, and middleware for a **Green Hydrogen Management System**
- Implemented multiple data ingestion and loading methods, enabling seamless data flow and automated **report generation** across the system
- Designed scalable **REST API** endpoints with modular route handling, ensuring clean separation of concerns and maintainable backend architecture

Projects

AI Conversational Agent

[Source Code](#)

- Spearheaded development of a production-ready **Text-to-Speech** engine and **Voice Activity Detection (VAD)** system within a 2-person subteam, delivering a fully functional **API-based streaming prototype** in under 2 weeks
- Optimized an agent-like **streaming architecture** to reduce input-to-output latency by **80%**, achieving near real-time responsiveness for voice-driven conversational interactions

Adobe GenSolve – Semantic PDF Analyst

[Source Code](#)

- Engineered a persona-driven **document intelligence pipeline** for Adobe Hackathon (Round 1B) using **DistilBERT** and **FAISS** vector search to extract, embed, and rank sections across multi-document PDF collections
- Built a 3-stage modular pipeline (extract → process → rank) outputting structured **JSON** with top-k ranked sections and importance scores, containerized with **Docker** for fully reproducible deployment in under 5 minutes

Technical Skills

Languages: Python, C++, JavaScript

Backend: Django, Node.js, Express.js, Electron

Frontend: React, TailwindCSS, HTML, CSS, Bootstrap

Clouds & Databases: AWS, PostgreSQL, MongoDB

Web Technologies: Docker, Socket.IO, Redis

Developer Tools: Postman, VS Code, GitHub

Certificates

Google IT Support Professional Certificate

2025

NPTEL – Internet of Things

2026

Full Stack Development – FacePrep

2024

Competitions

Purple Tech Challenge

2026

Qualified Round 2

Tata Steel AI Hackathon

2026

Ranked in **Top 200** among **1000+** participants

Goldman Sachs Hackathon

2026

Scored **240+** / **300**
