📞 +91 8770219607 ✉ aaryanema2004@gmail.com  [Portfolio](#)  [@lifelesscycle](#)

Technical Skills

Languages: Python, JavaScript

Backend: Django, Node.js, Express.js, Electron

Frontend: React, TailwindCSS, HTML, CSS

Clouds & Databases: AWS, GCP, PostgreSQL, MongoDB, FAISS

Web Technologies: Docker, Socket.IO, Redis

Developer Tools: Postman, VS Code, Git

Work Experience

Avyaan Management Limited (Bhopal)

May 2026 – June 2026

Software Development Intern

Offline

- Developed and deployed a full-featured **Point of Sale (POS)** system using the **MERN** stack (**React.js**, **Express.js**, **MongoDB**) with offline support and cross-platform accessibility.
- Delivered a complete end-to-end packaged solution with zero internet dependency, ensuring reliable multi-device deployment across environments
- Built an in-house **Finance Management App** with department-level oversight, role-based verification, and partial/full payment workflow support

Amasqis.AI (Oman & Chennai)

March 2025 – September 2025

AI Intern

Remote

- Architected and developed a **multi-tier backend** using **Express.js** with structured models, routes, and middleware for a **Green Hydrogen Management System**
- Implemented multiple data ingestion and loading methods, enabling seamless data flow and automated **report generation** across the system
- Designed scalable **REST API** endpoints with modular route handling, ensuring clean separation of concerns and maintainable backend architecture

Projects

AI Conversational Agent — Ollama • Python • Silero VAD • React.js • WebSockets

[Github](#)

- Spearheaded development of a production-ready **Text-to-Speech** engine and **Voice Activity Detection (VAD)** system within a 2-person subteam, delivering a fully functional **API-based streaming prototype** in under 2 weeks
- Optimized an agent-like **streaming architecture** to reduce input-to-output latency by **80%**, achieving near real-time responsiveness for voice-driven conversational interactions

Medicare — MERN Stack • React.js • Node.js • Express.js • MongoDB

[GitHub](#)

- Developed a full-stack **healthcare management system** with secure role-based portals for patients, doctors, and administrators, supporting appointment booking, doctor scheduling, and centralized electronic health records
- Built a scalable **RESTful backend** with real-time appointment notifications and responsive web interfaces, enabling seamless patient record management and cross-device accessibility

Certificates

Google IT Support Professional Certificate

2025

Full Stack Development – FacePrep

2024

Achievements

Purple Tech Challenge

Qualified for Round 2 by developing an AI-powered real-time CCTV analytics solution to track and analyze customer movement within retail stores.

Tata Steel AI Hackathon

*Ranked in the **Top 200** among **1000+** participants by developing a stacked ensemble machine learning model to predict optimal temperatures for steel rolls.*

Goldman Sachs Hackathon

*Scored **240+/300** by solving algorithmic and software engineering challenges involving data structures, optimization, and time-constrained problem-solving.*

Education

Vellore Institute of Technology, Bhopal

2023 - 2027

B.Tech in Computer Science & Engineering

8.46/10 CGPA
